

POSTERITY

Pricing Analysis & Business Feasibility

Prepared: June 2026 | Status: Locked for Stripe Update

1. Finalised Pricing Tiers

The following prices have been locked in following a full cost-per-delivery and labour feasibility analysis.

Tier	Annual Price	Text Messages	Videos	Weighted Units	Cost / Unit
Horizon	\$9.99	None	None	Storage only	N/A
Basic	\$99	4	1 (=2 units)	6	\$16.50
Premium	\$249	12	4 (=8 units)	20	\$12.45
Legacy	\$899	52	12 (=24 units)	76	\$11.83

Video messages are weighted at 2x a text message unit, reflecting higher storage, compression, processing, and posting complexity.

2. Video Weighting Rationale

Videos are not equivalent to text messages operationally. The 2x weighting reflects the following real costs:

Storage & Compression

- Video files are significantly larger than text — real Supabase storage costs apply
- Client-side compression via FFmpeg.wasm (Phase 4) reduces size but adds processing overhead
- At scale, migration to Cloudflare Stream or Mux will add direct cost per video

Delivery Complexity

- Meta API restricts video to 10 calls/second vs 300/second for text
- Video posting is a two-step process: upload container, then publish — with a processing wait between
- Instagram caps API-published posts at 100 per 24-hour rolling window
- Meta has a history of unannounced rate limit changes (96% reduction in 2025 broke many apps)

Labour Time

- Text post: estimated 2-5 minutes including QA
- Video post: estimated 10-20 minutes including format check, upload, processing wait, and verification
- Backup direct login fallback required for every video — adds overhead

3. Labour Cost Per Customer (Annual)

Assumptions: Employee rate \$20/hr. Text post = 5 mins. Video post = 15 mins.

Tier	Text Posts	Video Posts	Text Labour	Video Labour	Total Labour/yr
Basic	4	1	\$6.67	\$5.00	\$11.67
Premium	12	4	\$20.00	\$20.00	\$40.00
Legacy	52	12	\$86.67	\$60.00	\$146.67

Labour as a percentage of revenue at locked prices:

Tier	Price	Labour/yr	Labour %	Remaining After Labour
Basic	\$99	\$11.67	11.8%	\$87.33
Premium	\$249	\$40.00	16.1%	\$209.00
Legacy	\$899	\$146.67	16.3%	\$752.33

All tiers show healthy margins after labour. Legacy is operationally the heaviest customer but remains viable. Margins leave room for fixed costs, Stripe fees, and profit.

4. Fixed Cost Baseline

Estimated monthly fixed costs at small/early scale:

Service	Purpose	Est. Monthly Cost
Vercel	Hosting	\$20
Supabase Pro	Database + Auth + Storage	\$25

Service	Purpose	Est. Monthly Cost
Buffer	Social media scheduling	\$15
Twilio	Phone + voicemail	\$10
Meta API / Dev tools	Facebook + Instagram integration	\$10
Misc (domain, email, tools)	Operations	\$20
TOTAL		\$100/mo = \$1,200/yr

Note: Supabase video storage costs are genuinely low at early scale (cents per GB). Not a material cost concern until significant customer volume is reached.

5. Break-Even Analysis

Solo (No Hire) — Cover \$1,200/yr Fixed Costs

Tier	Price	Customers Needed
Basic	\$99	13
Premium	\$249	5
Legacy	\$899	2

With Part-Time Casual Hire — Cover \$7,200/yr Total Costs

Assumptions: \$500/mo labour + \$100/mo fixed = \$600/mo = \$7,200/yr

Tier	Price	Customers Needed
Basic	\$99	73
Premium	\$249	29
Legacy	\$899	9
Realistic Mixed (50 Basic / 20 Premium / 5 Legacy)	Blended	~25-35 customers

A mixed customer base of ~25-35 customers covers all costs including a part-time hire. This is a realistic 12-18 month target given the approval-gated intake model.

6. Mixed Customer Revenue Model

Illustrative scenario: 50 Basic + 20 Premium + 5 Legacy customers

Tier	Customers	Price	Annual Revenue	Annual Labour	Net After Labour
Basic	50	\$99	\$4,950	\$583	\$4,367
Premium	20	\$249	\$4,980	\$800	\$4,180
Legacy	5	\$899	\$4,495	\$733	\$3,762
TOTAL	75	—	\$14,425	\$2,117	\$12,308

After deducting \$7,200/yr total operating costs from \$12,308 net: approximately \$5,100 profit at 75 customers.

7. Upgrade Savings Story

The pricing structure rewards customers who upgrade. Savings vs paying Basic rate:

Tier	Price	At Basic Rate (\$16.50/unit)	Saving	Saving %
Basic	\$99	\$99	—	—
Premium	\$249	\$330	\$81	24.5%
Legacy	\$899	\$1,254	\$355	28.3%

Each upgrade tier delivers meaningful savings vs the entry rate. This supports a clear marketing narrative: more messages, more videos, lower cost per delivery.

8. Horizon Tier

Horizon remains at \$9.99/year. It serves two distinct purposes:

- Inactive account storage — for lapsed or paused plans
- Legacy builder starter — build content before committing to a full plan

No delivery occurs on Horizon. Content is stored but not sent until the death trigger is activated and a full plan is in place. Horizon auto-cancels when the customer upgrades to a paid tier.

\$9.99 is intentionally low — it is a holding fee, not a service fee. It keeps customers in the ecosystem during the gap between signup and activation.

9. Key Risks & Considerations

Meta API Risk

- Meta reduced Instagram API limits by 96% in 2025 without warning
- Video delivery is particularly exposed — 10 calls/second cap vs 300 for text
- Mitigation: backup direct login credentials stored securely, manual override capability essential
- Monitor Meta developer announcements as a standing operational task

Legacy Tier Operational Load

- 52 texts + 12 videos = ~\$146.67 labour per customer per year
- One Legacy customer = workload of ~13 Basic customers
- Recommend a Legacy customer cap during early stage solo/small team operations

Price Sensitivity

- Customers are paying upfront for a service that may not activate for years
- Higher prices slow early signups — balanced by the approval-gated model controlling intake
- Pricing review recommended at late stage build once time-per-post is fully understood (as noted in context)

Stripe Fee Impact

- Stripe fees ~2.9% + \$0.30 per transaction
 - Basic: ~\$3.17 per payment | Premium: ~\$7.52 | Legacy: ~\$26.37
 - Not material at early scale but factor into pricing review at growth stage
-

10. Stripe Products to Update

The following Stripe prices need to be updated to reflect locked pricing. New Price IDs will be generated — update codebase and Vercel env vars after each change.

Product	Old Price	New Price	Action Required
Posterity Horizon	\$9.99/yr	\$9.99/yr	No change
Posterity Basic	\$39/yr	\$99/yr	Update in Stripe + update Price ID
Posterity Premium	\$99/yr	\$249/yr	Update in Stripe + update Price ID
Posterity Legacy	\$299/yr	\$899/yr	Update in Stripe + update Price ID

Note: Always test checkout for each tier after updating Price IDs in Vercel.
